

HARISH PRAJEETH A S

Full-Stack Developer | Machine Learning Developer | Computer Science Undergraduate

Theni, Tamil Nadu | +91 89257 56476 | harishprajeeth007@gmail.com | github.com/harish-prajeeth | linkedin.com/in/harish-prajeeth-a-s

PROFESSIONAL SUMMARY

Computer Science undergraduate (B.E., expected May 2027) with three internships in full-stack development and applied machine learning, including a knowledge-distillation platform that compresses deep learning models for edge deployment. Skilled in React, Node.js, Express, Python, Flask, and FastAPI, with hands-on experience in computer vision (YOLOv11, CUDA, TensorRT) and BI reporting (IBM Cognos). Seeking a Full-Stack or Machine Learning Developer internship to deliver production-grade, scalable software.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, C

Frontend: React.js, HTML5, CSS3, Recharts

Backend: Node.js, Express.js, Flask, FastAPI, REST APIs, Authentication

Databases: MongoDB, SQLite

ML / Data: PyTorch, ONNX, Model Distillation, YOLOv11, OpenCV, CUDA, TensorRT, Pandas, NumPy, IBM Cognos

Tools: Git, GitHub, Docker, VS Code, Postman, Vite

PROFESSIONAL EXPERIENCE

Machine Learning Intern — Gradtwin Services (OPC) Pvt. Ltd., Chennai [Start] – Jul 2026

- Delivered "Distillation AI," compressing a large teacher model into a lightweight student model via an end-to-end Python training pipeline (data prep, teacher-student loss configuration, evaluation), preserving accuracy while improving inference speed.
- Recognized by HR leadership for dedication, professionalism, and technical contribution.

Data Analytics Intern — Adroit Technologies Innovative Solutions Pvt. Ltd., Coimbatore [Start] – Apr 2026

- Built interactive BI dashboards in IBM Cognos Analytics to visualize operational KPIs and support decisions.
- Modeled multi-source datasets and authored reports aligned with enterprise BI standards.

Web Development Intern — LitzTech, Coimbatore [Start] – Jul 2025

- Shipped responsive, production-ready client-facing web pages using HTML5, CSS3, and JavaScript.
- Collaborated with a 4-developer team on Git/GitHub; fixed UI defects and optimized landing-page performance.

SELECTED PROJECTS

DistillHub AI: Multi-Objective Knowledge Distillation Platform — Python, React, FastAPI, MongoDB, PyTorch, ONNX, Docker

- Built an Auto-KD platform compressing deep learning models for edge devices — async FastAPI/Beanie backend, ONNX safety audits, React dashboard for live training tracking.

SmartCityAI: Traffic Monitoring & Violation Detection — Python, YOLOv11, TensorRT, CUDA, FastAPI, Streamlit, OpenCV

- Built a real-time CV pipeline (YOLOv11 Nano, TensorRT, CUDA) tracking vehicle speed and detecting violations, linked to a Streamlit dashboard with PDF/CSV reports.

AI Stock Predictor — React, Node.js, Express, MongoDB, Recharts

- Built a full-stack app delivering real-time, AI-driven price forecasts via RESTful APIs with interactive Recharts visualizations.

Digital Doctor — React, Flask, Node.js, MongoDB

- Developed an AI-integrated healthcare platform with role-based dashboards, authentication, and secure data management.

NeuroSim / Jharkhand Tourism Platform — Python, FastAPI, React

- Built a FastAPI-backed decision-simulation engine with explainable recommendations, and a full-stack, mobile-first tourism site with a FastAPI content API.

EDUCATION

B.E. Computer Science — Nadar Saraswathi College of Engineering & Technology, Theni

Expected May 2027

CERTIFICATIONS

- Machine Learning Internship — Experience Certificate, Gradtwin Services (Jul 2026)
- Distillation AI — Project Completion Certificate, Gradtwin Services (Jul 2026)
- Data Analytics Internship — Completion Certificate, Adroit Technologies (Apr 2026)
- Web Development Internship — Completion Certificate, LitzTech (Jul 2025)
